THE

AMERICAN JOURNAL OF SCIENCE.

EDITOR: EDWARD S. DANA.

ASSOCIATE EDITORS

PROFESSORS GEO. L. GOODALE, JOHN TROWBRIDGE, H. P. BOWDITCH AND W. G. FARLOW, OF CAMBRIDGE,

PROFESSORS O. C. MARSH, A. E. VERRILL AND H. S. WILLIAMS, OF NEW HAVEN,

PROFESSOR GEORGE F. BARKER, OF PHILADELPHIA,
PROFESSOR H. A. ROWLAND, OF BALTIMORE,
MR. J. S. DILLER, OF WASHINGTON.

FOURTH SERIES.

VOL. VI—[WHOLE NUMBER, CLVI.]

WITH THREE PLATES.

NEW HAVEN, CONNECTICUT.
1898.

THE TUTTLE, MOREHOUSE & TAYLOR PRESS.

NEW HAVEN, CONN.

CONTENTS TO VOLUME VI.

Number 31.

Page

ART. I.—Origin and Significance of Spines: a Study in Evolution; by C. E. BEECHER. (With Plate I.) 1

II.—Electrical Discharge from the point of view of the Kinetic Theory of Matter; by J. E. MOORE 21

III.—Crystalline Symmetry of Torbernite; by T. L. WALKER 41

IV.—Further Separations of Aluminum by Hydrochloric Acid; by F. S. HAVENS 45

V.—Origin of the Corundum associated with the Peridotites in North Carolina; by J. H. PRATT 49

VI.—Erionite, a new Zeolite; by A. S. EAKLE 66

VII.—Winter Condition of the Reserve Food Substances in the Stems of certain Deciduous Trees; by E. M. WILCOX 69

VIII.—Metamorphism of Rocks and Rock Flowage; by C. R. VAN HISE 75

IX.—New Species of Ceratopsia; by O. C. MARSH 92

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Vapor Pressure of reciprocally soluble Liquids, OSTWALD: Electric Energy by Atmospheric Action, WARREN: Significance of Ionic Reactions in Electrochemistry, KÜSTER, 93.—Photoelectric Properties of Certain Colored Salts, ELSTER and GEITEL, 94.—Combustion in Rarefied Air, BENEDICENTI: Molecular Masses of Solid Substances, TRAUBE, 95.—Liquefaction of Hydrogen, DEWAR, 96.—New Methods for the Measurement of Self-Inductance, Mutual Inductance and Capacity, H. A. ROWLAND and T. D. PENNIMAN, 97.—Notes on the Zeeman Effect, J. S. AMES, R. F. EARHART and H. M. REESE, 99.—Elementary Course of Physics, J. C. P. ALDOUS, 100.—Storage Battery, A. TREADWELL, Jr., 101.

Geology and Natural History—Important Vertebrate Fossils for the National Museum, O. C. MARSH, 101.—U. S. Geological Survey: Occurrence of Petroleum in Burma, F. NOETLING, 102.—Text-book of Entomology, A. S. PACKARD: Bibliotheca Zoologica II., O. TASCHENBERG, 103.

Miscellaneous Scientific Intelligence—Seestudien, E. RICHTER, 103.—Field Columbian Museum, 104.

Number 32.

Page

ART. X.—Jurassic Formation on the Atlantic Coast.—Supplement; by O. C. MARSH 105

XI.—Mineralogical Notes; by C. H. WARREN 116

XII.—Origin and Significance of Spines: A Study in Evolution; by C. E. BEECHER 125

XIII.—Prehistoric Fauna of Block Island, as indicated by its Ancient Shell-heaps; by G. F. EATON. (With Plates II and III.) 137

XIV.—Registering Solar Radiometer and Sunshine Recorder; by G. S. ISHAM 160

XV.—Tertiary elevated Limestone Reefs of Fiji; by A. AGASSIZ 165

XVI.—Iodometric Determination of Molybdenum; by F. A. GOOCH and J. T. NORTON, Jr. 168

XVII.—Sölvsbergite and Tinguaite from Essex County, Mass.; by H. S. WASHINGTON 176

XVIII.—Occurrence of Native Lead with Roeblingite, Native Copper, and other minerals at Franklin Furnace, N. J.; by W. M. FOOTE 187

XIX.—Position of Helium, Argon and Krypton in the Scheme of Elements; by W. CROOKES 189

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—New Constituent of Atmospheric Air, RAMSAY and TRAVERS, 192.—Direct Elimination of Carbon Monoxide and its Reaction with Water, ENGLER and GRIMM, 193.—Osmotic Pressure and Electrolytic Dissociation, TRAUBE: Fusion in the Electric Furnace, ODDO, 194.—Ammonium Peroxide, MELIKOFF and PISSARJEWSKI: Molecular Masses of Inorganic Salts, WERNER, 195.—Sodium Carbide, MATIGNON, 196.

Geology and Mineralogy—Cycad Horizons in the Rocky Mountain Region, O. C. MARSH, 197.—Calamaria of the Dresden Museum, H. B. GEINITZ: Fossil Cephalopoda of the British Museum, G. C. CRICK: Two new fossils from Canada, J. F. WHITEAVES: Brief notices of some recently described minerals, 198.

Miscellaneous Scientific Intelligence—American Association for the Advancement of Science: Harper's Scientific Memoir, 199.—Electro-Mechanical Series; Industrial Electricity: Catalogue of Earthquakes on the Pacific Coast, 1769–1897 E. S. HOLDEN: Ostwald's Klassiker der Exacten Wissenschaften, 200.

Number 33.

Page

ART. XX.—Transition Temperature of Sodic Sulphate, a New Fixed Point in Thermometry; by T. W. RICHARDS 201

XXI.—Distribution and Quantitative Occurrence of Vanadium and Molybdenum in Rocks of the United States; by W. F. HILLEBRAND 209

XXII.—Electrosynthesis; by W. G. MIXTER 217

XXIII.—Notes on Species of Ichthyodectes, including the new species I. cruentus, and on the related and herein established genus Gillicus; by O. P. HAY 225

XXIV.—Determination of Manganese as the Pyrophosphate; by F. A. GOOCH and M. AUSTIN 233

XXV.—Occurrence of Dunite in Western Massachusetts; by G. C. MARTIN 244

XXVI.—Origin and Significance of Spines: A Study in Evolution; by C. E. BEECHER 249

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Laboratory Guide in Qualitative Chemical Analysis, H. L. WELLS: Short Course in Inorganic Qualitative Analysis for Engineering Students, J. S. C. WELLS: Introduction to Electro-chemical Experiments, F. OETTEL, 269.—Remarks on Colloidal Glass, C. BARUS, 270.

Geology and Mineralogy—Late Formations and Great Changes of Level in Jamaica, J. W. SPENCER, 270.—Resemblance between the Declivities of High Plateaus and those of Submarine Antillean Valleys, J. W. SPENCER, 272.—Eruptivgesteine des Kristianiagebietes, Part III, W. C. BRÖGGER, 273.—Baddeckite, a new variety of Muscovite, G. C. HOFFMANN, 274.—Text Book of Mineralogy with an extended Treatise on Crystallography and Physical Mineralogy, E. S. DANA, 275.—L'or dans la Nature, E. CUMENGE and F. ROBELLAZ, 276.

Botany—Illustrated Flora of the Northern States and Canada, N. L. BRITTON and ADDISON BROWN, 277.

Obituary—Professor JAMES HALL, 284.

Number 34.

Page

ART. XXVII.—Compressibility of Colloids, with Applications to the Jelly Theory of the Ether; by C. BARUS .. 285

XXVIII.—Eolian Origin of Loess; by C. R. KEYES 299

XXIX.—Dikes of Felsophyre and Basalt in Paleozoic Rocks in Central Appalachian Virginia; by N. H. DARTON and A. KEITH 305

XXX.—Diaphorite from Montana and Mexico; by L. J. SPENCER 316

XXXI.—Detection of Sulphides, Sulphates, Sulphites and Thiosulphates in the presence of each other; by P. E. BROWNING and E. HOWE 317

XXXII.—Twinned Crystals of Zircon from North Carolina; by W. E. HIDDEN and J. H. PRATT 323

XXXIII.—Brachiopod Fauna of the Quartzitic Pebbles of the Carboniferous Conglomerates of the Narragansett Basin, R. I.; by C. D. WALCOTT 327

XXXIV.—Origin and Significance of Spines; A Study in Evolution; by C. E. BEECHER 329

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Neon and Metargon, companions of Argon in Atmospheric Air, RAMSAY and TRAVERS, 360.—Metargon, DEWAR: Density and Boiling Point of Liquid Hydrogen, DEWAR, 361.—Boiling Point of Liquid Ozone, TROOST, 362.

Miscellaneous Scientific Intelligence—American Association for the Advancement of Science, 363.—British Association, 372.

Number 35.

Page

ART. XXXV.—Irregular Reflection; by C. C. HUTCHINS.. 373

XXXVI.—Occurrence of Sperrylite in North Carolina; by W. E. HIDDEN 381

XXXVII.—Description of a Fauna found in the Devonian Black Shale of Eastern Kentucky; by G. H. GIRTY 384

XXXVIII.—Separation of Nickel and Cobalt by Hydrochloric Acid; by F. S. HAVENS 396

XXXIX.—Contributions to Paleontology; by F. A. LUCAS 399

XL.—Value of Type Specimens and Importance of their Preservation; by O. C. MARSH 401

XLI.—Origin of Mammals; by O. C. MARSH..... 406

XLII.—Causes of Variation in the Composition of Igneous Rocks; by T. L. WALKER..... 410

XLIII.—Relation between Structural and Magneto-optic Rotation; by A. W. WRIGHT and D. A. KREIDER 416

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Crystallized Metallic Calcium, MOISSAN: Preparation and Properties of Calcium Hydride, MOISSAN, 428.—Improved method for determining Molecular Mass by the Boiling Point, WALKER and LUMSDEN, 429.—Chemical Effects of the Silent Electric Discharge, BERTHELOT, 430.—New Gas, C. F. BRUSH, 431.—Electricity and Magnetism: a Mathematical Treatise for advanced undergraduate students, F. F. NIPHER: Electrical currents excited by Röntgen rays, A. WINKELMANN, 432.—Reflection of Cathode rays, H. STARKE. Change of the energy of Cathode rays into light rays, E. WIEDEMANN: Theory of the Coherer, D. VAN GULIK and E. DORN: Absorption of light produced by a body placed in a magnetic field, A. RIGHI, 433.

Geology and Mineralogy—Eighteenth Annual Report of the Director of the U. S. Geological Survey, 1896–7, 433.—Summary Report of the Geological Department of Canada for the year 1897, 434.—Geological History of the Isthmus of Panama and portions of Costa Rica, R. T. HILL: Physical geography of Worcester, Mass., J. H. PERRY: Handbuch der Mineralogie, C. HINTZE, 435.—Manual of Determinative Mineralogy with an Introduction on Blowpipe Analysis, G. J. BRUSH and S. L. PENFIELD: Law of Mines and Mining in the United States, D. M. BARRINGER and J. S. ADAMS, 436.—Canadian minerals, G. C. HOFFMANN, 437.

Obituary—JAMES HALL, 437.

Number 36.

Page

ART. XLIV.—Another Episode in the History of Niagara Falls; by J. W. SPENCER 439

XLV.—Apparatus for Measuring very High Pressures; by A. DEF. PALMER, Jr. 451

XLVI.—Application of Iodine in the Analysis of Alkalies and Acids; by C. F. WALKER and DAVID H. M. GILLESPIE 455

XLVII.—Associated Minerals of Rhodolite; by W. E. HIDDEN and J. H. PRATT 463

XLVIII.—Revision of the Moraines of Minnesota; by J. E. TODD 469

XLIX.—Preliminary Report on some new marine Tertiary horizons discovered by Mr. J. B. Hatcher near Punta Arenas, Magellanes, Chile; by A. E. ORTMANN 478

L.—Comparative Value of Different Kinds of Fossils in Determining Geological Age; by O. C. MARSH 483

LI.—Families of Sauropodus Dinosauria; by O. C. MARSH. 487

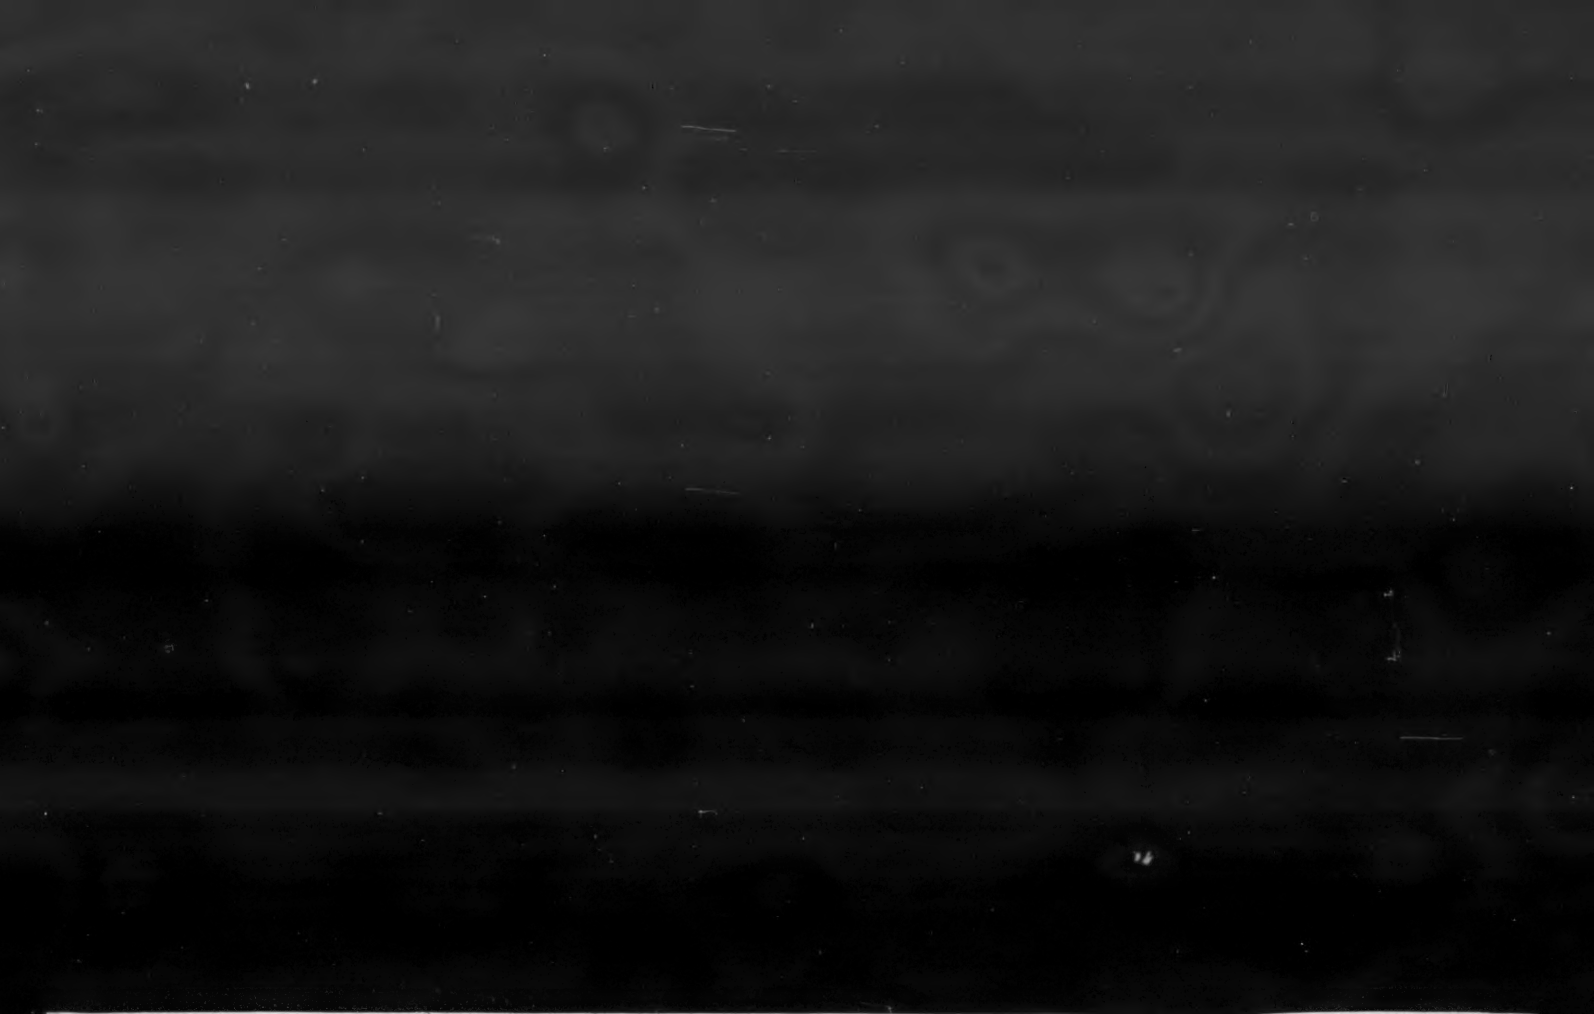
LII.—Biotite-tinguaite Dike from Manchester by the Sea, Essex County, Mass.; by A. S. EAKLE 489

LIII.—Descriptions of new American Actinians, with critical notes on other species, I.; by A. E. VERRILL 493

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Hyponitrous acid and Hyponitrites, KIRSCHNER: Experiments with Helium, TRAVERS, 499 —Calcium nitride, MOISSAN, 500.—Sodium sub-oxide and peroxide produced by combustion. FORCRAND: Aluminum nitride, FRANCK, 501.—Enantiomorphism. KIPPING and POPE, 502.—Doctrine of Energy; a Theory of Reality: Gravitation constant and mean density of the earth, F. RICHARZ and O. KRIGAR-MENZEL: Theory of the Coherer, E. ASCHKINASS, 503.—Theory of the Hall effect in an Electrolyte: Free Expansion of Gases, 504.

Geology and Mineralogy—Geological History of the Isthmus of Panama and Portions of Costa Rica, R. T. HILL, 505.—Geology and Mineral Resources of the Judith Mountains of Montana, W. H. WEED and L. V. PIRSSON, 508.—Fossil Medusæ, C D. WALCOTT: Cretaceous Foraminifera of New Jersey, R. M. BAGG, Jr: Lava-flows of the western slope of the Sierra Nevada, Cal., F. L. RANSOME 509.—Bibliography and Index of North American Geology, Paleontology, Petrology and Mineralogy for 1896, F. B. WEEKS: Report on the Geology of Southwest Nova Scotia, L. W. BAILEY: Report on a traverse of the northern part of the Labrador Peninsula from Richmond Gulf to Ungava Bay, A. P. LOW: Report on the Geology of the French River Sheet, R. BELL, 510.—Granite des Pyrénées et ses phenoménes de contact, A. LACROIX: Igneous Rocks of Tasmania, W. H. TWELVETREES and W. F. PETTERD: Sulphohalite, J. H. VAN'T HOFF and A. P. SAUNDERS, 511.

Miscellaneous Scientific Intelligence—National Academy of Sciences: Studies from the Yale Psychological Laboratory, E. W. SCRIPTURE, 512.—Report on the Survey of the Boundary Line between Alleghany and Garrett Counties, Md, L. A. BAUER: Catalogue of Scientific and Technical Periodicals, 1665–1895, H. C. BOLTON: Differential and Integral Calculus, P. A. LAMBERT, 513.


INDEX TO VOLUME VI, 514.
